

# KAPURED

## FIRMA USŁUGOWA

High-Quality Accounting and Human Resources Services in Poland

### ABOUT KAPURED F.U:

- Founded in 2009
- Located in Gliwice
- 2 Company Servers

## DISTRIBUTING LEGACY APPS TO REMOTE CLIENTS

### Interview of Dariusz Kwiatkowski, Owner

KAPURED is a full-service accounting and HR management firm. They also provide start-up services, assisting with administrative issues like social security, preparing contracts, and corporate taxes. KAPURED supports a wide variety of businesses, including McDonald's franchises all over Poland!

With a wide variety of customers throughout the region, KAPURED needed a modern solution to easily share their business applications with all their users. The solution also had to provide the ability to easily manage their two servers from a distance.

In 2014, KAPURED installed a single full-featured TSplus Enterprise license on one of the company servers. It enabled clients to remotely connect and use their professional applications hosted on the server, via RDP or web browser clients.

Since then, KAPURED has expanded their server farm to include a web portal for use with TSplus Web Client. The ability to access the servers using a computer, a tablet or a smartphone makes it the best remote access solution for their business!

# INCREASING EFFICIENCY AND QUALITY OF SERVICE

TSplus provides an easy way to reduce Space and Time impact while maintaining Security

The implementation of TSplus has led to a significant increase in efficiency and quality of service. With no more space and time obstacles, the distance between KAPURED servers is not an issue anymore!

With TSplus Web access, employees can work anywhere, anytime, around the clock.

Our secure and reliable connections and efficient support ensure high customer satisfaction. TSplus helped the company to move to a higher technological level!

*"Our cooperation with TSPlus is flawless since the first days. Its employees react very promptly to our remarks and questions. Today, the servers locations, as well as our journeys do not constitute any hindrance any more. We sincerely recommend their software to all who care about safety and joys of mobility !"*
